Subject: RE: Consultation on KEVICC future plans

Morning [redacted]

I have now had a chance to review with [redacted] & can feedback as follows:

Given the proposed growth in the town, we need to secure a capacity to support a PAN 210, with the ability to also take x2 bulge years of PAN 240.

This would require a minimum net capacity figure of 1340 – this figure includes 6th form places & the bulges.

This would be a reduction from your current net capacity minimum of 1552, so would enable the rationalisation of the estate, but does give us the comfort that we can manage future growth.

If we are able to agree this position, we can support the consultation.

Very happy to have your thoughts/further comments etc,

Thanks [redacted]
